**January 2019**

| **Date: July 10th** | **Item-033** |
|---|---|
| **To:** Users of the CCHS, 2012, 2013, 2014 and 2011/2012 | |
| **Subject:** Error with labelling/data for STS_1, STS_2 | |
| **Product(s) affected:** Data dictionary reports for 2012, 2013, 2014, and 2011/2012. Data issue for 2011/2012. Questionnaire for 2012. | |
| **Year(s) affected:** 2012, 2013, 2014 and 2011/2012 | |

**Description of the problem(s):**

The questions STS_Q1 and STS_Q2 were changed from having 5 categories to 4 in 2012.

They changed from:
1-Excellent, 2- Very Good, 3- Good, 4- Fair, 5-Poor
to:
1-Excellent, 2- Good, 3-Fair, 4-Poor

This change was not reflected in the 2012 questionnaire (5 categories are still shown). While the change was implemented in 2013 to the questionnaire, the format attached to the variables STS_1 and STS_2 was kept as having 5 categories up until 2014. This affected the category labels displayed in the data dictionary reports for 2012 to 2014. Additionally, the combined 2011/2012 data has a discordance in what each value represents.

**Suggested correction(s):**
For 2012, the questions should be considered to have only 4 response categories as listed above.

For 2012 to 2014, the data dictionary labels for the values 1 to 4 should be considered as those listed above. If you intend to apply formats to the data in SAS or SPSS, note that the hs_fmt.sas/HSvale.sps will have to be updated. For SAS, the hs_fmt.sas can be updated for STS_1/STS2 by changing the format from '`GOOD5FM`' to '`PAS12FM`'. For HSvale.sps, the format for STS_1/2 has to be changed directly by deleting the line for:

```
2      'VERY GOOD',
```

…and renumbering the rows for values 3/4/5 to be 2/3/4.

For 2011/2012, the data can be corrected according to the code below to allow for 5 categories to be maintained (since the 2011 data did have 5 categories).

*Note that while the data for 2011/2012 can be corrected, there may be bias introduced to estimates produced using these variables due to the fact that the propensity to respond to a given category at the positive or negative end of the

**January 2019**

scale is affected by how many categories are in the scale. That is, the lack of a 'Very good' category may have affected how respondents answered. The cumulative percent of the positive response categories (Excellent/very good/good) changed from 88% in 2011 to 79% in 2012 for STS_1 and from 94% to 90% for STS_2. So, there were slightly more 'negative' responses to the questions in 2012. Use caution when interpreting results from the corrected 2011/2012 file.

**Correction steps:**

For 2011/2012, run the following code to correct the data:

```
if ADM_YOI=2012 then do;
      if STS_1 = 2 then do; STS_1=3; end; /*Put the 'Good' responses
from 2012 into code 3 to align with 2011 format*/
      if STS_1 = 3 then do; STS_1=4; end; /*Put the 'Fair' responses
from 2012 into code 4 to align with 2011 format*/
      if STS_1 = 4 then do; STS_1=5; end; /*Put the 'Poor' responses
from 2012 into code 5 to align with 2011 format*/
end;

if ADM_YOI=2012 then do;
      if STS_2 = 2 then do; STS_2=3; end; /*Put the 'Good' responses
from 2012 into code 3 to align with 2011 format*/
      if STS_2 = 3 then do; STS_2=4; end; /*Put the 'Fair' responses
from 2012 into code 4 to align with 2011 format*/
      if STS_2 = 4 then do; STS_2=5; end; /*Put the 'Poor' responses
from 2012 into code 5 to align with 2011 format*/
end;
```

**January 2019**

| **Date: March 2017** | **Item-032** |
|---|---|
| **To:** Users of the CCHS, 2009-2012, and 2014 | |
| **Subject:** CCC_131 and CCC_31A are inaccurate by as much as 0.006%. | |
| **Product(s) affected:** Annual and biannual Master, Share and PUMF files between 2009-2012 and the 2014 annual file | |
| **Year(s) affected:** All cycles, including the 2011-2012 biannual file | |

**Description of the problem(s):** A limited number of responses to the CCHS are modified each cycle during data processing to correct for inconsistencies and logical impossibilities in respondent answers. Two consistency edits in the aforementioned cycles have been incorrectly applied. The first table below demonstrates the consistency edit applied in processing, the second table demonstrates the corrective action that should have been taken instead:

| Concept | Edit applied | Incorrect action |
|---|---|---|
| Reports having follow-up treatment for colorectal cancer but previously reported never being diagnosed with cancer | Had colorectal cancer screening (CCS_83E=1) and does not have cancer (CCC_131 = 2) | CCC_131 = 1<br>CCC_31A = NA |
| Reports having follow-up treatment for breast cancer but previously reported never being diagnosed with cancer | Had follow-up of breast cancer treatment (MAM_31E = 1) and does not have cancer (CCC_Q131 = 2) | CCC_131 = 1<br>CCC_31A = NA |

| Concept | Edit that should have been applied | Correction that should have been taken |
|---|---|---|
| Reports having follow-up treatment for colorectal cancer but previously reported never being diagnosed with cancer | Had colorectal cancer screening (CCS_83E=1) and (CCC_31A = 2,DK,RF or CCC_131 = DK) | CCC_31A = 1 |
| Reports having follow-up treatment for breast cancer but previously reported never being diagnosed with cancer | Had follow-up of breast cancer treatment (MAM_31E=1) and (CCC_31A = 2,DK,RF CCC_131= DK) | CCC_31A = 1 |

**Suggested correction(s):** Although this issue cannot be corrected, the two variables affected a maximum of 3 respondents per cycle, or less than 0.006% of respondent records.

**Correction steps:** N/A

**January 2019**

| **Date: March 2017** | **Item-031** |
|---|---|
| **To:** Users of the 2009-2010, 2010, 2011-2012, and 2012 PUMF | |
| **Subject: CHPG10 - Incorrect variable category description** | |
| **Product(s) affected:** PUMF Derived Variable Documentation (French only) | |
| **Year(s) affected:** 2009-2010, 2010, 2011-2012, 2012 | |
| **Description of the problem(s):**<br><br>The label for CHPG10=6 in the French Derived Variable documentation is incorrectly labelled as HCU_03C=6. | |

**Suggested correction(s):** The label of this response category should be:

| Valeur | Condition(s) | Description |
|---|---|---|
| 6 | CHP_10 = 6 | La plus récente consultation avec un autre médecin était à un CLSC / Centre de santé communautaire. |

This change affects only the condition field found in the French version of the Derived Variable documentation, and therefore the data are not impacted.

**Correction steps:** Use response category and condition labels as detailed above.

**January 2019**

| **Date: June 2015** | **Item-029** |
|---|---|
| **To:** Users of the CCHS 2010-2014 Master, Share, PUMF, and Link files | |
| **Subject:** Insurance, Personal income, and Health number may not be accurate for 12-17 year olds | |
| **Product(s) affected:** Master, Share, PUMF, and Link files | |
| **Year(s) affected:** 2010 to 2014, including the two-year files 2011-2012 and 2013-2014 | |

**Description of the problem(s):**

When a selected respondent is under 18 years old, there are some household level questions they are not asked. Instead, a person-most-knowledgeable (PMK) is selected form the household to answer the INS, INC, HMC, FSC, and ADM questions.

Unfortunately, in INS, INC, and ADM, there are questions that pertain to the selected respondent. The question text read to the PMK would have been of the form "Do you..."/"What is your...", so it is possible that these questions were answered by the PMK as it pertains to them.

Below is a list of the questions that may have been affected by this problem:

| Variable/Question | Question text | Note |
|---|---|---|
| INS_1 | Do you have insurance that covers all or part of the cost of:<br><br>your prescription medications? | Responses to subsequent questions INS_1A/B/C, INS_2A/B/C, INS_3A/B/C, and INC_4A/B/C (type of insurance) would be affected by this as well. |
| INS_2 | (Do you have insurance that covers all or part of:)<br><br>your dental expenses? | |
| INS_3 | (Do you have insurance that covers all or part of:)<br><br>the costs of eye glasses or contact lenses? | |
| INS_4 | (Do you have insurance that covers all or part of:)<br><br>hospital charges for a private or semi-private room? | |
| INC_6A to INC_6O | Thinking about your total personal income, from which of the following sources did you receive | Data is affected only for 2010, 2011, and 2012. In 2013 and 2014, cases with a respondent under 18 |

**January 2019**

| | | |
|---|---|---|
| | any income in the past 12 months? | were skipped past the personal income questions. |
| INC_7 | What was the main source of your personal income? | |
| INC_8A, INC_8B, INC_8C, INC_8D | What is your best estimate of your total personal income, before taxes and deductions, from all sources in the past 12 months? | |
| ADM_Q03A | Having a provincial or territorial health number will assist us in linking to this other information.<br><br>Do you have a/an ^DT_PROVINCEE health number? | Variables are on the link file as:<br>ADM_Q03B=LNK_HNP and<br>ADM_Q03HN=LNK_HN |
| ADM_Q03B | For which province or territory is your health number? | |
| ADM_Q03HN | What is your health number? | |

Note that this problem does not affect cases where the interview was being completed by proxy. All of the text would have been read to the proxy respondent as “Does he/she...” / “What is his/her...”/etc..

**Suggested correction(s):**

There is no way to identify whether or not the PMK answered the questions as they pertained to themselves or the child selected respondent. Use results based on these questions for any 12 to 17 year old respondent with caution.

**Correction steps:** n/a

**Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.

Electronic mail: statcan.hd-ds.statcan@canada.ca

**January 2019**

| **Date: June 2015** | **Item-028** |
|---|---|

**To:** Users of the CCHS 2011-2014 Master, Share, and Public use microdate files

**Subject:** SPSDATT derived incorrectly, incorrect frequencies in data dictionary; SPS DV specification issues.

**Product(s) affected:** Master, Share, PUMF

**Year(s) affected:** 2011 to 2014, including 2011-2012 and 2013-2014

**Description of the problem(s):**

The 'Not stated' category for the derived variable SPSDATT was derived in two different ways:

- Proxy interviews were coded 99
- Cases with either SPS_03 or SPS_08 not answered (don't know, refuse, not stated) were coded as 9

Since the range of possible valid values of SPSDATT is from 2 to 8, the processing code for 'Not stated' should be 99. See below for the correct DV specs.

Another problem with SPSDATT is in the data dictionary frequency report. The frequencies for this variable are shown for the values 2 to 9, which treats the value 9 as a valid score on the social provisions scale. The frequency for the valid scores should only be from 2 to 8. Please do not use the frequencies for SPSDATT listed in the data dictionary.

**Suggested correction(s):**

Corrected DV specs for SPSDATT are:

| Value | Condition(s) | Description | Notes |
|---|---|---|---|
| 96 | DOSPS = 2 | Module not selected | NA |
| 99 | ADM_PRX = 1 | Module not asked - proxy interview | NS |
| 99 | SPS_03 in (7,8,9) or SPS_08 in (7,8,9) | At least one required question was not answered (don't know, refusal, not stated) | NS |
| SPST03 + SPST08 | (1 <= SPS_03 <=4) and (1 <= SPS_08 <=4) | Score obtained on Social Provisions Scale – Attachment (min: 2; max: 8) | |

**Correction steps:** n/a

**Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.

**January 2019**

| **Date: June 2015** | **Item-027** |
|---|---|

**To:** Users of the CCHS 2008, 2011 and 2012 master, share and PUMF

**Subject:** PCU_Q152 and PCU_Q153 – label errors

**Product(s) affected:** Master, Share, and Public Use Microdata Files

**Year(s) affected:** 2008, 2011 and 2012

**Description of the problem(s):**
The labels for the categories of PCU_Q153 (When was the last time?) are incorrect on the data dictionary and SAS and SPSS label files. Furthermore, the external names indicated on the questionnaire for PCU_Q152 and PCU_Q153 (for 2012 only) have been incorrectly switched.

**Suggested correction(s):**

The labels for PCU_Q153 (external name PCU_152) on the data dictionary and SASS/SPSS label files should be:

| Code | Labels should be: |
|---|---|
| 1 | Less than 1 year ago |
| 2 | 1 year to less than 2 years ago |
| 3 | 2 years to less than 3 years ago |
| 4 | 3 years to less than 4 years ago |
| 5 | 4 years to less than 5 years ago |
| 6 | 5 or more years ago |

The external names indicated on the questionnaire for these questions should always be:

| Question | Concept | Question name | External name |
|---|---|---|---|
| How often do you usually have a general physical check-up? | Frequency - general physical check-up | PCU_Q152 | PCU_153 |
| When was the last time? | Physical check up - last time | PCU_Q153 | PCU_152 |

**Correction steps:** Use response category and question labels as detailed above.

**Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.

**January 2019**

| **Date: June 2015** | **Item-026** |
|---|---|
| **To:** Users of the CCHS files | |
| **Subject: Typographical modifications in the descriptions for Work Stress (WST) Derived Variables and change in Derived Variable code for WSTDJST.** | |
| **Product(s) affected:** Master and share files and public use microdata files | |
| **Year(s) affected:** Cycle 1.1, 3.1, and 4.1 | |

**Description of the problem(s):**
The following typographical revisions were made to some Derived Variable descriptions.

Most changes only affect the variable descriptions and therefore the data are not impacted. However, the derived variable WSTDJST had an error in the specifications which also resulted in the variable being calculated incorrectly. Data users who are using the WSTDJST variable are instructed to use the code provided in this Errata to correct the variable.

| **Variable(s)** | **E = English F = French** | **Issue and corrected metadata** | **Files affected** |
|---|---|---|---|
| WSTDSKI | E, F | **Revised description -**<br>Description should be changed to:<br>"This variable indicates the respondent's skill discretion at their main work in the past 12 months (skill requirement). It is based on questions about whether the respondent was required to keep learning new things, whether his/her job required a high level of skill and whether the job required that the respondent do things over and over (monotony).<br>1. Higher scores indicate that lower skills are required for the job.<br>2. According to the original instrument, higher scores indicate greater work stress.<br>3. Scores were inversed in the temporary reformat for question WST_Q404." | Derived Variable document |

**January 2019**

| | | | |
|---|---|---|---|
| WSTDAUT | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates whether the respondent's main job in the past 12 months allows them freedom in how to do their job and if they have a lot of say in what happens with regard to their job.<br>1. Higher scores indicate lower decision authority.<br>2. Higher scores indicate greater work stress." | Derived Variable document |
| WSTDPSY | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates the respondent's psychological demands in their main job in the past 12 months. It is based on questions about whether the respondent is free from conflicting demands and if their main job in the past 12 months is very hectic.<br>1. Higher scores indicate greater psychological demands.<br>2. Higher scores indicate greater work stress.<br>3. Scores were inversed in the temporary reformat for question WST_Q405." | Derived Variable document |
| WSTDJIN | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates how the respondent feels about their level of job security in their main job.<br>1. Higher scores indicate greater job insecurity.<br>2. Higher scores indicate greater work stress." | Derived Variable document |
| WSTDPHY | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates whether the main job in the past 12 months requires a lot of physical effort.<br>1. Higher scores indicate greater physical demands at work.<br>2. Higher scores indicate greater work stress." | Derived Variable document |

**January 2019**

| | | | |
|---|---|---|---|
| WSTDSOC | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates the social support available to the respondent at his/her main job in the past 12 months. It is based on questions about whether or not the supervisor and the people the respondent worked with were helpful in getting the job done, and whether the respondent was exposed to hostility or conflict from the people they worked with.<br>1. Higher scores indicate lower social support at work.<br>2. Higher scores indicate greater work stress.<br>3. Scores were inversed in the temporary reformat for question WST_Q410." | Derived Variable document |
| WSTDJST | E, F | **Revised description -**<br>Description should be changed to:<br><br>"This variable indicates whether the respondent experienced job strain at their main work in the past 12 months. Job strain is measured as a ratio of psychological demands to decision latitude which includes skill discretion (skill attitudes) and decision authority.<br>1. Higher scores indicate greater job strain.<br>2. Higher scores indicate greater work stress.<br>3. Scores are inversed here for questions WST_Q401, WST_Q402, WST_Q403, WST_Q409 (decision latitude questions) for use in the denominator. Since WST_Q404 had been inversed for the calculation of WSTDSKI, it is inversed again before calculating WSTDJST.<br>4. At the beginning of this section, scores were inversed in the temporary reformat for question WST_Q405. The inversed WST_Q405 is used here (as in WTSDPSY)."<br><br>**New note for the specifications of the DV (see step 3 on next page):**<br>"All items have +1 added to them so that the denominator will not be 0 under any combination of answers." | Derived Variable document |

**January 2019**

| | | | |
|---|---|---|---|
| WSTDJST | E, F | **Revised calculation for WSTDJST:**<br>The two following temporary reformatting steps are executed and then the WSTDJST variable is created according to the revised code:<br><br>**Step 1: Temporary Reformatting**<br>*Modify the scale of responses for the questions WST_401 to WST_406 and WST_409 from 1 to 5, to 0 to 4, and inverse WST_404 and WST_405.*<br><br>If WST_401 <= 5 then WSTT401 = (WST_401 - 1)<br>If WST_402 <= 5 then WSTT402 = (WST_402 - 1)<br>If WST_403 <= 5 then WSTT403 = (WST_403 - 1)<br>If WST_404 <= 5 then WSTT404 = (4 - (WST_404 - 1))<br>If WST_405 <= 5 then WSTT405 = (4 - (WST_405 - 1))<br>If WST_406 <= 5 then WSTT406 = (WST_406 - 1)<br>If WST_409 <= 5 then WSTT409 = (WST_409 - 1)<br><br>**Step 2: Temporary Reformatting**<br>*Invert the scale of responses for the questions WSTT401 to WSTT403, WSTT404 & WST409, from 0 to 4, to 4 to 0*<br>If WSTT401 <= 4 then WSTa401 = (4 - WSTT401)<br>If WSTT402 <= 4 then WSTa402 = (4 - WSTT402)<br>If WSTT403 <= 4 then WSTa403 = (4 - WSTT403)<br>If WSTT404 <= 4 then WSTa404 = (4 - WSTT404)<br>If WSTT409 <= 4 then WSTa409 = (4 - WSTT409)<br><br>**Step 3: Final code**<br>*Calculate the score for WSTDJST using revised code:*<br><br>If WST_401 = 6, then WSTDJST = 9.96;<br><br>If (WST_401 in (7, 8, 9) or<br>WST_402 in (7, 8, 9) or<br>WST_403 in (7, 8, 9) or<br>WST_404 in (7, 8, 9) or<br>WST_405 in (7, 8, 9) or<br>WST_406 in (7, 8, 9) or<br>WST_409 in (7, 8, 9)) then WSTDJST = 9.99;<br><br>Else WSTDJST =<br>(((WSTT405 + 1) + (WSTT406 + 1)) / 2) /<br>(((WSTa401 + 1) + (WSTa402 + 1) +<br>(WSTa404 + 1) + (WSTa403 + 1) +<br>(WSTa409 + 1)) / 5 ) | Data file, Derived Variable document |

**January 2019**

| **Date: June 2015** | **Item-025** |
|---|---|
| **To:** Users of the 2009 and 2009-2010 Master and Share files | |
| **Subject:** INC_6K and INC_6J - Reversed variable labels | |
| **Product(s) affected:** 2009 and 2009-2010 Master and share files | |
| **Year(s) affected:** 2009 and 2009-2010 | |

**Description of the problem(s):**
Two "Sources of Income" response categories, "Child Tax Benefit" and "Social Assistance or Welfare", in questions INC_6J and INC_6K were reversed in the 2009 and 2009-2010 master and share files. The 2010 files are not affected.

**Suggested correction(s):**

Users should modify the format programs in order to switch the two answer labels i.e. INC_6J should refer to "Child Tax Benefit" and INC_6K should refer to Social Assistance or Welfare.

The table below provides the corrections for the erroneous labels in the data dictionary.

| **Concept** | **Variable name as it appears on the questionnaire** | **Variable to consult for frequency in the data dictionary** |
|---|---|---|
| Sources personal income: social assistance or welfare | INC_6J | INC_6K |
| Sources personal income: Child tax benefits | INC_6K | INC_6J |

**Correction steps: n/a**

Electronic mail: statcan.hd-ds.statcan@canada.ca

**January 2019**

| **Date: June 2015** | **Item-024** |
|---|---|
| **To:** Users of the CCHS, Cycle 1.1 to 2014 | |
| **Subject:** SUI_3, SUI_5, SUI_6A-SUI_6H concepts are inaccurate | |
| **Product(s) affected:** Master and Share file Data Dictionary reports, CCHS Cycle 1.1 to 2014 (all years) | |
| **Year(s) affected:** Cycle 1.1 to 2014, including two-year files | |

**Description of the problem(s):**

The SUI module was designed to treat respondents sensitively, due to the serious nature of the questions. Whenever a respondent answered 'No' or 'Don't Know' or refused to answer, they would skip the rest of the questions in the module.

In processing, 'Don't Know' or 'Refuse' answers to any question meant that all subsequent questions were coded 'Not Stated'. The 'No' responses, however, caused subsequent questions to be coded as 'Not Applicable'. If a respondent answered 'No' to having seriously considered suicide in the last 12 months, they would skip the question asking them if they had ever attempted suicide in their lifetime. This means that SUI_3 only applies to people who had seriously considered in the last 12 months, rather than all respondents who have seriously considered suicide in their lifetime.

Similarly for SUI_Q5, it was only asked if the respondent had answered 'Yes' to SUI_Q1, SUI_Q2, SUI_Q3 and SUI_Q4, those who had seriously considered committing suicide in the last 12 months and had actually attempted suicide in the last 12 months, rather than all those who had attempted suicide at any point in their lifetime.

**Suggested correction(s):**

Since respondents were skipped past questions, the there is no correction that can be made to the data. Instead, with the data as it is, the Concepts for the SUI variables should be modified to reflect the flow pattern of the module (new text in red):

| | |
|---|---|
| SUI_3 | Considered Suicide in last 12 months and Attempted suicide - lifetime |
| SUI_5 | Consulted health professional following suicide attempt from last 12 months |
| SUI_6A | Suicide attempt (last 12 months) - consulted family doctor or g.p. |
| SUI_6B | Suicide attempt (last 12 months) - consulted psychiatrist |
| SUI_6C | Suicide attempt (last 12 months) - consulted psychologist |
| SUI_6D | Suicide attempt (last 12 months) - consulted nurse |
| SUI_6E | Suicide attempt (last 12 months) - consulted social worker or counsellor |
| SUI_6G | Suicide attempt (last 12 months) - consulted religious or spiritual advisor |
| SUI_6H | Suicide attempt (last 12 months) - consulted a teacher or guidance counsellor |
| SUI_6F | Suicide attempt (last 12 months) - consulted other health professional |

**January 2019**

| |
|---|
| The questionnaire flows on the 'No' responses will be removed from the redesigned 2015 CCHS. |
| **Correction steps:** N/A |
| **Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.<br><br>Should you have any questions, please do not hesitate to contact us at:<br><br>Health Statistics Division<br>613-951-1746<br>Electronic mail: statcan.hd-ds.statcan@canada.ca |

**January 2019**

| **Date: June 2015** | **Item-023** |
|---|---|
| **To:** Users of the CCHS, cycle 1.1 and 3.1 to 2014 | |
| **Subject:** UPE_Q1A – flow error | |
| **Product(s) affected:** Master, Share, Rapid Response and Public Use Microdata Files | |
| **Year(s) affected:** 1.1, 3.1 to 2014, including two-year files | |

**Description of the problem(s):**
The question UPE_Q1A asks if the respondent had done any bicycling in the past 12 months. Respondents skipped this question if they had indicated that they had done biking in the past 3 months (PAC_Q1), or that they had done bicycling to work or school in the past 3 months (PAC_Q8).

Because of the skip pattern, the value for UPE_Q1A (external name UPE_01A) on all data files was set to 6 - 'Not applicable'. The value should have been set to 1 – 'Yes'.

No other questions were affected by this flow.

**Suggested correction(s):**
If left as is, the concept for UPE_01A 'Done any bicycling in past 12 months' would exclude those who did any bicycling in the past 3 months. Since this is not intuitive, it would be clearer if the data for this variable were modified based on the answer in PAC.

The value for the variable UPE_01A can easily be changed on the data file, using the values from PAC. See the correction steps below.

**Correction steps:** To fix the value of UPE_01A, run the following code when working with the data file:

```
if PAC_1D = 1 or PAC_8 = 1 then UPE_01A = 1;
```

**Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.

**Suggested correction(s):**
The table below provides the corrections for the erroneous labels, as well as which files were affected.

| Variable | Description | Files affected |
|---|---|---|
| CCS_182 | Code 6 should be "10 years or more" not "5 years or more". In Cycle 2.1, code 5 should be "5 to < 10 years". | HS_pfe.sas, HS_pff.sas, HSvalf.sps, HSvale.sps, B2020 HS.IVX |
| CCS_185 | Code 6 should be "10 years or more" not "5 years or more". In Cycle 2.1, code 5 should be corrected to "5 to < 10 years". | |
| LOPG020 | Code 6 should be "LAYOFF,STRIKE,LOCKOUT" | HS_pfe.sas, HS_pff.sas, HSvalf.sps, HSvale.sps |

**January 2019**

| | | |
|---|---|---|
| MEX_06 | Concept should be 'Duration of breastfeeding last child' | HS_lbe.sas, HS_lbf.sas, HSvare.sps, HSvarf.sps, Data Dictionary, Alpha Index, Topical Index, Record Layout |
| PCU_154M (PCU_56N in 2008) | Question should be: "What are the reasons that you have not had a general physical check-up in the past 3 years? - Unable to leave the house because of a health problem" | Data Dictionary |
| PCU_154N (PCU_56M in 2008) | Question should be: "What are the reasons that you have not had a general physical check-up in the past 3 years? - Other" | |
| PAC_7A | Question should be "How many times?" | |
| PAC_8B | Question should be "About how much time did you spend on each occasion?" | |
| PAC_7 | Concept should be "Walked to work or school / last 3 months" | Data Dictionary, Alpha Index, Topical Index, Record Layout, B2020 HS.IVX |
| PAC_8 | Concept should be "Bicycled to work or school / last 3 months" | |
| UPE_02 | Concept should be "In-line skating or rollerblading - past 12 mo" | |
| UPE_02A | Concept should be "Frequency - wears a helmet - in-line skating" | |
| UPE_02B | Concept should be "Frequency - wears wrist guards - in-line skating" | |
| UPE_02C | Concept should be "Frequency - wears elbow pads - in-line skating" | |
| UPE_06 | Concept should be "Has done skateboarding - past 12 mo" | |
| UPE_06A | Concept should be "Frequency - wears a helmet - skateboarding" | |
| UPE_06B | Concept should be "Frequency - wears wrist guards - skateboarding" | |
| UPE_07 | Concept should be "Played ice hockey past 12 months" | |

| **Date: June 2014** | **Item-018** |
|---|---|
| **To:** All users of CCHS files listed below. These include files with reference year 2009-2013. Only the files listed below are affected. | |
| **Subject:** Error in CCCDDIA logic | |
| **Product(s) affected:**<br>**2009:** Master, Share, BC buy-in, and Rapid responses on: Sleep Apnea (SLP), Osteoporosis (OST), and Infertility (IFT)<br>**2010:** Master, Share, PUMF, and Rapid responses on: H1N1, Infertility (IFT), and Stigma and Mental Health (STG-MHE)<br>**2009-2010:** Master, Share, and PUMF<br>**2011:** Master, Share, Rapid response on neighbourhood environment (NBE), the Survey of Living with Neurological Conditions in Canada (SLNCC)-CCHS – linked file, and the Survey on Living with Chronic Diseases in Canada (SLCDC) – Diabetes and Respiratory files<br>**2012:** Master, Share, PUMF, and Rapid responses on: Canada Food Guide (CFG) and Food Skills – Part 1 (FS1)<br>**2011-2012**: Master, Share, and PUMF<br>**2013:** Rapid response on Food Skills – Part 2 (FS2) | |
| **Year(s) affected:** 2009, 2010, 2009-2010, 2011, 2012, 2011-2012, and 2013 | |
| **Description of the problem(s):**<br>The Diabetes Type derived variable (CCCDDIA) has a flaw in the logic that allowed respondents who should have been coded to gestational diabetes to be coded as Type 2 diabetes or 'not stated'. Female respondents who answered CCC_10A=1 and CCC_10B=2 should have been classified as gestational diabetes. However, several cases also met the condition for Type 2 diabetes or for not stated. Because these other categories were derived first, these cases were coded as such, before the check for gestational diabetes could be run.<br><br>Additionaly, all of the cases that were coded as '4' could actually be correctly coded as type 2 diabetes. Because of the faulty logic, these cases did not meet any of the conditions and would not have been coded. This is likely the reason for the creation of the category 4 in the first place. | |
| **Suggested correction(s):**<br>According to the Ng-Dasgupta-Johnson algorithm, upon which CCCDDIA is based, gestational diabetes should be derived first. In practice however, it is typical to list the DV code types in ascending order after the processing codes are derived.<br><br>To preserve the order of DV codes and fix the problems, the conditions for 'not stated' and type 2 have been rewritten with an extra condition that ensures there is no overlap with gestational diabetes. The new rule for type 2 diabetes now also covers all of the cases that would have otherwise been left uncoded and assigned a value of | |

**January 2019**

4 – 'unable to classify'. The new DV code now properly classifies all respondents without the need for this catch-all code. The corrected code for the derived variable is:

| Value | Condition(s) | Description | Notes |
|---|---|---|---|
| 6 | CCC_101 > 1 | Population exclusions | NA |
| 9 | (CCC_10A in (7,8,9) or<br>CCC_10B in (7,8,9) or<br>CCC_10C in (97,98,99) or<br>CCC_101 in (7,8,9) or<br>CCC_102 in (997,998,999) or<br>CCC_105 in (7,8,9) or<br>CCC_106 in (7,8,9)) and<br>(CCC_10A in (2,6,7,8,9) or CCC_10B in (1,6,7,8,9)) | At least one required question was not answered (don't know, refusal, not stated). Also, gestational diabetes cannot be derived. | NS |
| 1 | (DHH_SEX = 1 and<br>CCC_101 = 1 and<br>CCC_105 = 1 and<br>CCC_106 = 2 and<br>(CCC_10C <=3 and (DHH_AGE < 30 or CCC_102 < 30))) or<br>(DHH_sex = 2 and<br>CCC_101 = 1 and<br>CCC_10B in (1,6) and<br>CCC_105 = 1 and<br>CCC_106 = 2 and<br>(CCC_10C <=3 and (DHH_AGE < 30 or CCC_102 < 30))) | Type 1 diabetes | |
| 2 | CCC_101 = 1 and<br>(CCC_105 = 2 or<br>CCC_102 >= 30 or<br>CCC_10C > 3 or<br>CCC_106 = 1 or<br>(CCC_105 = 1 and<br>(CCC_102 >= 30 or CCC_10C > 3))) and<br>(CCC_10A in (2,6,7,8,9) or CCC_10B in (1,6,7,8,9)) | Type 2 diabetes | |

# Canadian Community Health Survey – Annual Component
# Errata

**January 2019**

**Correction process:**

1. Create a temporary file including the variables in column **A**.
2. Rename the variables in column **A** to temporary variables based on the corresponding variables in column **B** (e.g. BRX_16M to BRX_16N_00, and HMC_10D to HMC_10C_00, etc.).
3. Rename the temporary variables (e.g. BRX_16N_00, HMC_10C_00, etc.) to the correct variables as indicated in column B (e.g. BRX_16N, HMC_10C, etc.).
4. Combine the temporary file which now includes the variables with their correct values with the main data file.

| **Description of the problem(s):** The main household weight variable (WTSE_MHH on the master file and WTSE_SHH on the share file) on all the HS_HHWT.txt file is invalid and differs from their corresponding FWGT weight on the B5_HH.txt Bootstrap file.<br><br>Since Bootvar uses the variable FWGT to calculate the final estimates, any analysis on the 2005 Households weights using Bootvar would be correct and would not need to be redone. However, any preliminary analysis based only on the variables WTSE_MHH or WTSE_SHH would be incorrect and would need to be revised.<br><br>Users should know that the errors were considered minimal. | |
| **Suggested correction(s):** The master and share files have been redone with the corrected household weight and are available upon request. | |
| **Correction steps:** N/A | |
| **Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.<br><br>Should you have any questions, please do not hesitate to contact us at:<br><br>Health Statistics Division<br>613-951-1746<br>Electronic mail: statcan.hd-ds.statcan@canada.ca | |

**January 2019**

| **Date: December 21, 2007** | **Item-004** |
|---|---|
| **To:** Data users of cycle 2.1, sub-sample 3 – Master and share file | |
| **Subject:** Error on number of person interviewed in the following document: "Guidelines for the use of sub-sample variables" | |
| **Cycle(s) affected:** Cycle 2.1 | |
| **Product(s) affected:** Guidelines for the use of sub-sample variables – Master and share file | |
| **Description of the problem(s):**<br><br>Page 7 of the document :<br><br>• Number 18,981 replaces 18,091 in the following sentense :<br><br>"A total of ~~18,091~~ 18,981 respondents were interviewed for HSAS at the same time as their CCHS interview."<br><br>• Number 13,024 replaces 12,031 in the following sentense :<br><br>"A total of ~~12,031~~ 13,024 respondents were re-contacted after having been interviewed previously for CCHS." | |
| **Suggested correction:** N/A | |
| **Corrective Pseudo-code:** N/A | |
| **Contact us:** We regret any inconvenience this may have caused you or your organization and thank you in advance for your understanding.<br><br>Should you have any questions, please do not hesitate to contact us at:<br><br>Health Statistics Division<br>613-951-1746<br>Electronic mail: statcan.hd-ds.statcan@canada.ca | |

**January 2019**

| **Date: October 12, 2007** | **Item-003** |
|---|---|
| **To:** Data Users and licensees of the Canadian Community Health Survey data, Cycles 2.1 and 3.1, **Public Use Microdata File** | |
| **Subject:** Derived variable on work stress scale – Job strain (WSTCDJST and WSTEDJST) | |
| **Cycle(s) affected:**<br><br>Cycle 2.1 (optional content selected by 12 health regions within Newfoundland and Labrador, Ontario and Saskatchewan)<br><br>Cycle 3.1 (optional content selected by all health regions in Quebec and Saskatchewan). | |
| **Product(s) affected:**<br><br>Derived variable on work stress scale – Job strain (WSTCDJST and WSTEDJST)<br><br>Referred to hereafter as WSTnDJST where n = C or E. | |
| **Description of the problem(s):**<br><br>The Job strain scale should reflect the ratio of the psychological demands and decision making leeway in accordance with the principle that strong demands combined with weak decision making autonomy generate more stress.<br><br>Certain variables from the denominator of the WSTnDJST derived variable are incorrectly specified in the ***Derived Variable (DV) Specifications*** document for cycles 2.1 and 3.1. The data are therefore erroneous. The ratio of strong demands and decision making leeway result is scores that are too high. | |
| **Suggested correction(s):**<br><u>Public use microdata file (PUMF):</u><br>Cannot be corrected by users given the fact that only the derived variables exist on the file. User support via remote access is available upon request.<br><br><u>Share and Master Files:</u><br>A temporary reformatting step aiming to invert certain variables must be added to the specifications for the WSTnDJST variable. The step to invert the categories (to arrange them from 4 to 0 rather than from 0 to 4) must be applied to the following variables: WSTn401, WSTn402, WSTn403, WSTn405 and WSTn409.<br><br>A “patch file” is available on request. | |

**January 2019**

**Corrective Pseudo-code:**
The two following temporary reformatting steps are executed and then the WSTnDJST variable is created according to the DV specifications:

**Step 1 : Temporary Reformatting**

*Modify the scale of responses for the questions WSTn_401 to WSTn_406 and WSTn_409 from 1 to 5, to 0 to 4*

If WSTn_401 <= 5 then WSTn_401 = (WSTn_401 - 1)
If WSTn_402 <= 5 then WSTn_402 = (WSTn_402 - 1)
If WSTn_403 <= 5 then WSTn_403 = (WSTn_403 - 1)
If WSTn_404 <= 5 then WSTn_404 = (WSTn_404 - 1)
If WSTn_405 <= 5 then WSTn_405 = (WSTn_405 - 1)
If WSTn_406 <= 5 then WSTn_406 = (WSTn_406 - 1)
If WSTn_409 <= 5 then WSTn_409 = (WSTn_409 - 1)

**Step 2 : Temporary Reformatting**

*Invert the scale of responses for the questions WSTn_401 to WSTn_403, WSTn_405 and WSTn_409, from 0 to 4, to 4 to 0*

If WSTn_401 <= 4 then WSTn_401 = (4 - WSTn_401)
If WSTn_402 <= 4 then WSTn_402 = (4 - WSTn_402)
If WSTn_403 <= 4 then WSTn_403 = (4 - WSTn_403)
If WSTn_405 <= 4 then WSTn_405 = (4 - WSTn_405)
If WSTn_409 <= 4 then WSTn_409 = (4 - WSTn_409)

**Step 3 :**

See WSTnDJST in the ***Derived Variable (DV) Specifications*** document.

**January 2019**

| **Date:** October 12, 2007 | **Item-002** |
|---|---|
| **To:** Data Users and licensees of the Canadian Community Health Survey data, Cycle 3.1, Public Use Microdata File (PUMF) | |
| **Subject:** Question universes in 6 modules in the PUMF data dictionary for Cycle 3.1 are incorrect. | |
| **Cycle(s) affected:** Cycle 3.1 | |
| **Product(s) affected:** Data dictionary of the Cycle 3.1 PUMF in English [English Data Dictionary (Freqs).pdf] and in French [French Data Dictionary (Freqs).pdf]. | |
| **Description of the problem(s):**<br><br>The derived variable descriptions for the following modules:<br><br>• Smoking (SMK)<br>• Colorectal Cancer Screening (CCS)<br>• Exposure to second-hand smoke (ETS)<br>• Prostate Cancer Screening (PSA)<br>• Smoking – Physician counseling (SPC)<br>• Youth Smoking (YSM) | |

**January 2019**

**Suggested correction(s):**

- Smoking (SMK):

  - SMKEDYCS : Respondents who answered SMKE_202 = (1, 7 or 8) or SMKE_01A = 8 and SMKE_01B = 8

- Colorectal Cancer Screening (CCS):

  - CCSEFOPT: All respondents
  - CCSE_180 : Respondents aged 35 and over with CCSEFOPT = 1
  - CCSE_182 : Respondents who answered CCSE_180 = (1, 7 or 8)
  - CCSE_83A : Respondents who answered CCSE_180 = (1, 7 or 8)
  - CCSE_83B : Respondents who answered CCSE_180 = (1, 7 or 8)

- Exposure to second-hand smoke (ETS):

  - ETSE_10 : Respondents with DHHEDHSZ > 1 or who answered (SMKE_202 = (3, 7 or 8) or (SMKE_01A = 8 and SMKE_01B = 8))
  - ETSE_G11 : Respondents who answered ETSE_10 = (1, 7 or 8)
  - ETSE_20: Respondents who answered SMKE_202 = (3, 7 or 8) or (SMKE_01A = 8 and SMKE_01B = 8)
  - ETSE_20B: Respondents who answered SMKE_202 = (3, 7 or 8) or (SMKE_01A = 8 and SMKE_01B = 8)

- Prostate Cancer Screening (PSA) :

  - PSAEFOPT : All respondents
  - PSAE_170 : Males aged 35 and over with PSAEFOPT = 1
  - PSAE_172 : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73A : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73B : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73C : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73G : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_ 73D : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73E : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_73F : Respondents who answered PSAE_170 = (1, 7 or 8)
  - PSAE_174 : Males aged 35 and over with PSAEFOPT = 1
  - PSAE_175 : Respondents who answered PSAE_174 = (1, 7 or 8) or PSAE_170 = 8

**January 2019**

- Smoking – Physician counseling (SPC) :

  - SPCEFOPT : All respondents

  - SPCE_10 : Respondents with SPCEFOPT = 1 who answered (SMKE_202 = (1 or 2) or SMKE_06A = 1 or SMKE_09A = 1 and HCUE_1AA = (1, 7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 or SMKE_202 = (7 or 8) or SMKE_06A = (7 or 8) or SMKE_09A = (7 or 8))

  - SPCE_11 : Respondents with SPCEFOPT = 1 who answered SPCE_10 = (1, 7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 or SMKE_202 = (7 or 8) or SMKE_06A = (7 or 8) or SMKE_09A = ( 7 or 8) or HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) or SMKE_06A = 1 or SMKE_09A = 1)

  - SPCE_12 : Respondents with SPCEFOPT = 1 who answered SPCE_11 = (1, 7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 or SMKE_202 = (7 or 8) or SMKE_06A = (7 or 8) or SMKE_09A = ( 7 or 8) or HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) or SMKE_06A = 1 or SMKE_09A = 1)

  - SPCE_13 : Respondents with SPCEFOPT = 1 who answered SPCE_11 = (1, 7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 or SMKE_202 = (7 or 8) or SMKE_06A = (7 or 8) or SMKE_09A = ( 7 or 8) or HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) or SMKE_06A = 1 or SMKE_09A = 1)

  - SPCE_14A : Respondents with SPCEFOPT = 1 who answered SPCE_13 = (1, 7 or 8) or SPCE_12 = (7 or 8) or SPCE_11 = (7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 and SMKE_202 = (7 or 8) and SMKE_06A = (7 or 8) and SMKE_09A = ( 7 or 8) and HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) and SMKE_06A = 1 and SMKE_09A = 1)

  - SPCE_14B : Respondents with SPCEFOPT = 1 who answered SPCE_13 = (1, 7 or 8) or SPCE_12 = (7 or 8) or SPCE_11 = (7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 and SMKE_202 = (7 or 8) and SMKE_06A = (7 or 8) and SMKE_09A = ( 7 or 8) and HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) and SMKE_06A = 1 and SMKE_09A = 1)

  - SPCE_14C : Respondents with SPCEFOPT = 1 who answered SPCE_13 = (1, 7 or 8) or SPCE_12 = (7 or 8) or SPCE_11 = (7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 and SMKE_202 = (7 or 8) and SMKE_06A = (7 or 8) and SMKE_09A = ( 7 or 8) and HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) and SMKE_06A = 1 and SMKE_09A = 1)

**January 2019**

- SPCE_14D : Respondents with SPCEFOPT = 1 who answered SPCE_13 = (1, 7 or 8) or SPCE_12 = (7 or 8) or SPCE_11 = (7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 and SMKE_202 = (7 or 8) and SMKE_06A = (7 or 8) and SMKE_09A = ( 7 or 8) and HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) and SMKE_06A = 1 and SMKE_09A = 1)

- SPCE_14E : Respondents with SPCEFOPT = 1 who answered SPCE_13 = (1, 7 or 8) or SPCE_12 = (7 or 8) or SPCE_11 = (7 or 8) or SPCE_10 = (7 or 8) or SMKE_01A = 8 and SMKE_01B = 8 and SMKE_202 = (7 or 8) and SMKE_06A = (7 or 8) and SMKE_09A = ( 7 or 8) and HCUE_1AA = (7 or 8) and (SMKE_202 = (1 or 2) and SMKE_06A = 1 and SMKE_09A = 1)

# Canadian Community Health Survey – Annual Component
# Errata

**January 2019**

| **Date:** October 12, 2007 | **Item-001** |
|---|---|
| **To:** Data Users and licensees of the Canadian Community Health Survey data, Cycle 3.1, Public Use Microdata File (PUMF) | |
| **Subject:** Derived variable documentation contains misleading information indicating that some variables are included in the PUMF when they are not. | |
| **Cycle(s) affected:** Cycle 3.1 | |
| **Product(s) affected:**<br><br>Cycle 3.1 PUMF derived variable documentation in English (DERIVE_E.pdf) and in French (DERIVE_F.pdf). | |
| **Description of the problem(s):**<br><br>The derived variable descriptions for the following modules:<br><br>- Smoking – Cessation Aids (SCA)<br>- Smoking – Nicotine dependence (NDE)<br>- Smoking – Stages of change (SCH)<br><br>indicate that the derived variables are available in the PUMF, while they are not. Since these modules have only been selected by one or two territories, the information is sensitive to respondent identity disclosure and is therefore not included in the PUMF. | |
| **Suggested correction:** N/A | |
| **Corrective Pseudo-code:** N/A | |
