Concept: Sampled collection period

Question Text:

Universe: All respondents

Note: The collection periods are usually comprised of three months of collection. The values represent the year and the beginning month of each collection period based on the 2021 collection. However, the CCHS did not conduct any collection in May 2021 due to the Census. To accommodate the missed collection, the collection for June was allocated to the period including July and August. The period beginning in September was extended to collect up until November 14th and the final collection period which began the next day was extended to February 7 2022.

MEX_080 was coded as "not stated" for respondents who reported a weight gain during pregnancy that is higher than their total weight before pregnancy (MEX_080 > MEX_070).

Users should take caution with extreme values for the variable MEX_085. It is possible that for certain cases, due to a misunderstanding of the question, this value represents the total weight at the end of the pregnancy, rather than the weight gained during the pregnancy.
